Andrei Tiumentsev

Digital Marketing Student | AI-assisted research / Digital products

Tel Aviv, Israel | tiumentsev.andrei@gmail.com | tiumentsev.dev

Summary

Digital Marketing student at Ariel University with two years of QA automation experience. Independent AI-assisted product work combines research, fact checking, information structure and data analysis with requirements, UX, testing and delivery.

Skills

Research and analysis: Fact checking, information structure, data interpretation

AI workflow: AI-assisted research and implementation with Codex and Claude

Product quality: Requirements, user flows, review, testing; Playwright and TypeScript

Experience

QA Automation | Russia | 2 years of professional experience

- Used Playwright and TypeScript for automated software testing.

Projects

Independent projects. Responsible for requirements, UX/UI, review, testing and delivery, with AI-assisted implementation using Codex and Claude.

Sidur - Windows staff scheduling application

- Designed workflows for shifts, staffing checks, hours, estimated pay and reports for a kindergarten.
- Application includes Supabase authentication, access roles and cloud synchronization across computers.

tiumentsev.dev/projects/sidur

OlehAI - Mobile UX prototype

- Designed and tested an interactive relocation journey covering priorities, bank comparison and visit preparation, demonstrated with fictional data.

tiumentsev.dev/projects/olehai

Mistfall Atlas - Live web application

- Investigated game formulas using reverse-engineering methods, including decompilation, memory dumps and tests; derived some formulas independently.
- Designed the equipment search and calculators, reviewed implementation, tested key flows and deployed the live site.
